研究生姓名	Patience Fero	导师	杨君	学院	应用经济学
专业	经济管理学院		答辩时间	2026 年 05 月 21 日	
学位论文题目	Does Capital Market Liberalization Drive Digital Transformation? Evidence from Chinese A-Shares' Inclusion in the MSCI Emerging Markets Index				
对论文的修改情况说明： 1. Measurement: The digital transformation index is a text-based proxy, so it reflects disclosure intensity rather than direct investment. 2. Identification: Treat TWFE as a benchmark only; use the modern staggered-DID results as the main interpretation. 3. Mechanisms: Financing is better read as structure adjustment, governance evidence needs caution, and knowledge spillover should remain theoretical. 4. Scope: Effects depend on estimator choice, measurement, and firm implementation capacity, and the evidence is China-specific. 5. Abstract revision: Correct the Chinese and English abstracts using the supervisor-provided translation, and make the wording clearer and more accurate. 论文作者：  2026 年 5 月 21 日
